

How to access online resources:

If you have a smartphone, ipad, tablet, chromebook, or computer at home your child has access to several online educational sites we use in our classroom.

First go to the Clarence Central Schools homepage > then click Harris Hill Elementary > Student Resources > A symboloo page will pop up which gives several different icons for apps that are used in our school. If you click on these apps they are direct links to log – ins for your child. Please note...in first grade we do not use all of these apps. Please find a list of the ones we use in class and your child is familiar with below. You may click on the link in symboloo.

Math:

1.IXL

- Find in the symboloo or go to ixl.com

your child's log in is his/her full first and last name @clarencesdny

password: 4 digit birthday month and day

Example: kimberlycastiglione@clarencesdny password: 0719 (july19 birthday)

*After your child logs into this site, he/she should hit learning, math first grade. Here you will find 254 first grade math skills. I have gone through and highlighted all the skills we have learned so far in grade one. At this time, I am asking that you have your child practice the highlighted skills. A good way to manage this is to assign your child a specific skill area to work on and complete before they move on to another skill.

2. REFLEX

- Find in the symboloo or go to reflexmath.com

Hit log in – student log in – teacher user name – type in **mroswell**

Your child's password is his/her initials and four birthdate numbers example: kc0719

*This site is used to enhance your child's fluency with addition and subtraction facts. We try to use this site throughout the week. It is a great site that unlocks games as your child improves his/her fluency with math facts. This site is used throughout 1-5th grade. We try to get on this site a few times a week for at least 15 minutes to build fact fluency.

3. Prodigy

- Find in the symbaloo or go to prodigy.com

Each child has a unique log in and password. The children LOVE this website. It combines math with mythological/Pokemon type creatures. They should know their password. If they do not, just email me and I will give it to you.

Reading:

4. Raz-kids

- Find in the symbaloo or go to raz-kids.com

Hit kids log in > teacher code is mroswell > your child's name will appear – each child selected his/her password

This program allows your child to read books at his/her instructional level. This level is based on his/her comprehension bars. At times, the computer will automatically level a child up. After looking at his/her reading data, I may agree with the computer or move the child back down. I do this based on their comprehension quizzes.

The children are very familiar with this program. Please note when they log in, they are to click the level up icon. The books here are assigned to your child and are at their instructional level. You will notice a green check if they have listened to, read, and/or taken a quiz for a book. Please check my classroom website page for daily reading assignments and more information.

As your child increases in level, you will notice when they take the comprehension quiz, questions will not be read to them anymore. There are times when we need to assist the children with reading questions. You may have to do this at home as well.

As your child reads a book, he/she earn stars. The star rewards are used to build an avatar game. In school the kids are only allowed to use their stars on Friday. This helps them focus on their reading all week and celebrate on Fridays.

5. EPIC

- Find in the symbaloo or go to getepic.com

Log in – students & educators – student log in – enter class code: gvt0174

At this time the students have not had access to this program at home. The kids absolutely love epic!!! It is a wonderful site filled with amazing fiction and non-fiction books. We have used this site to read books on specific themes this year, learn about fiction and non-fiction books, and watch some videos that give us information.
